PROMPT SHIPMENTS

Milwaukee, Wisconsin, U. S. A.

Design

AN article need not be expensive in order to be both sightly and of correct design for the purpose.

Cost

TO produce any article economically, it is necessary to manufacture it in a large way with all of the machinery of efficiency—in other words, to standardize it.

Quality

THE man who specializes on one thing, usually does that thing better than the one who does a little of everything.

Introductory

THIS Book is issued for the information of Dealers and their customers. In it we are pleased to present the Creamdor Architectural Woodwork Units, a line of standardized millwork, which for excellence of design and generally practical character is unequalled by any so far offered to the trade.

The series covers a complete set of Moulding designs for interior and exterior use, Cabinet-work, Stairs, Porches and the General Carpentry required by builders; all of it chosen with especially discriminating taste and grouped correctly as to architectural style.

This work is manufactured on the unit system in a wholesale way,—the only manner in which so widely varied a line can be furnished economically and promptly to the trade.

The patterns we carry in stock for 24-hour shipment are designated by the stock sign  and those of the semi-stock character, which require 3 to 5 days time to assemble, are indicated by the shield .

The builder who requires Millwork for a bungalow of the Craftsman style, a Colonial dwelling of the simpler type, an English Gothic cottage, or a house in what we term the Modern Domestic style, will find in this line the designs he is looking for; all of them true to the type, and, as we price them, very moderate in cost.

We issue also a special catalogue on the Creamdor line of Veneered Doors, showing patterns of doors suitable for the millwork displayed in this book, and on request will furnish copies to Dealers who are interested.

The Creamdor woodwork units are "quality" goods. With quality we offer also the lowest prices at which merchandise of such character can be sold for, and the unequalled Cream City Shipping Service.

Cream City Sash and Door Co.

COLONIAL STYLE

Volumes have been written of this dignified style—one which has made so marked an impression in the architecture of our country.

To us it has an especial appeal, for Mt. Vernon, Faneuil Hall, the old City Hall of New York, the Hancock House and many other structures with associations interesting to every American, were designed in varying degrees of excellence on the lines of this school.

A type of the revival of classic forms in architecture, its details have a very distinctive refinement. This quality will be found in the designs we have grouped under this head.

The patterns shown—which necessarily are of the simpler and practical kind—will be found to cover the needs of the house builder, with proper regard for both taste and economy in construction.

CRAFTSMAN-MISSION STYLE

This classification covers a type of design which, in recent years, has come into great favor in every part of the United States, but especially the west.

Some trace its origin to the work of William Morris, the English poet and artist, who has influenced so greatly the course of decorative art.

In America the term Mission is applied to the product of this style, from its resemblance to the hand-wrought articles of the old California Missions.

To be true to the type the lines should be straight, the design sturdy and simple, giving the effect of hand-wrought, bench-made carpentry.

The set of units we present under this head will be found very consistent and true to the style.

They are especially suitable for the Bungalow, but can be applied with equal success to buildings of other types.

MODERN DOMESTIC STYLE

Under this classification is grouped a line of House Trimmings tastefully designed and of the character demanded by practical builders of the American home. While they can scarcely be classified under any specific architectural period or style, they are designed with nice regard for proportion, and when applied as suggested in the numerous plates shown in this book, their effect is most pleasing and satisfactory.

In this group are some of the most popular designs of standard House Fittings, Mouldings, etc., called for by the building trade. Most of them we carry in stock in large quantity for prompt shipment.

The buyer to whom time of delivery and cost in construction is an object, will do well to consult our stock-list.

ENGLISH STYLE

We use this heading to characterize a line of Wood-work Units which may be very appropriately used in the fitting of the English domestic style of cottage or mansion now so popular.

The character of the Mouldings, Doors, Stairs, etc., differs markedly from our other styles, showing a little of the Renaissance flavor. Of necessity the line is restricted, but the architect who wishes to select the fittings for an English cottage, a Stein room, with Semi-Gothic feeling, or a Flemish dining-room, will find the series useful and the various members correct to the period.

We carry a large assortment of the units in stock in several standard woods.

Shipping System

Shipments OUR organization for the prompt dispatch of either stock or special work is admittedly the most efficient of any in the Millwork trade. It extends from our lumber yard and stores department through our factory, warehouses and shipping rooms—every order being followed through with a thoroughness that insures its delivery ON TIME.

The receipt of each order is acknowledged by a duplicate of its entry on which is given the date it will go forward.

Stock Sizes ORDERS for standard stock sizes, i. e., those indicated by the ✕ cross ✕ in our catalogues, will be shipped in 24 hours from receipt.

Ninety per cent of our stock orders are shipped the same day they reach us, providing they are received not later than 2:30 P. M., but to provide time for assembling and proper packing, we fix the time limit at 24 hours.

Semi-Stock Sizes SIZES and styles of goods indicated by the ⚡ shield ⚡ are assembled from stock units. We require 3 to 5 days to assemble and finish them; in the case of the more elaborate cabinet work, 7 to 10 days at times.

Special Sizes OUR factory departments are organized for especially prompt service on odd items and especially designed woodwork. Service will depend upon the size and character of the order. On the ordinary type of special millwork, we can offer shipments in 7 to 15 days, on the more complicated, 3 to 5 weeks. Each acknowledgment will give the date of delivery, and on this date patrons may unfailingly depend.

Stair Work

THE patterns of stair work shown in our Creamdor line set a new standard in the stock millwork trade. Not only are they correct according to the best architectural standard, but in quality of material and construction they are built as is no other line on the market. In short, they are precisely such in character as any man, requiring durability and honest quality, may be satisfied to build into his house.

**Quality
and
Character**

ONLY genuine wood carvings, carefully designed, are used. No cheap composition or pressed wood ornaments are in any case substituted.

**Solid
Carvings**

THE corners of our plain shaft newels are made with lock joints showing the unbroken grain of the wood from side to side of each face, and all the mouldings, mitres, and joinery, are finished with care by skilled cabinet makers.

**Lock
Corners**

THE designs are classified as Colonial, English, Craftsman and Modern Domestic. Each of these styles is carried out in excellent taste and fidelity to the type. The line is a demonstration of the fact that excellence in quality or refinement in taste does not necessarily mean extravagance in cost, for, as you will see by the following pages, our prices are very modest.

**Artistic
Design**

Cabinet Work

IMPORTANT features of the modern house or apartment are the Colonnades, the built-in Sideboards, the China Closets, Cupboards, etc., the convenience of which is bringing them into great demand. These can be made a pleasing feature of the house, or by their ugliness and clumsy construction, can make themselves a horror to the householder.

**Built-in
Furniture**

Such articles should harmonize with the other woodwork, and the intelligent architect usually makes them to, but built specially to order or to odd measurements they are very expensive.

**Harmony
in Design**

The Creamdor units offer suggestions in design and a great saving in cost.

**Economy
in Cost**

The Creamdor Columns, Colonnades, China Closets, etc., shown on the following pages, we carry in unit form largely. To assemble, finish and pack them for shipment we require from 5 to 10 days, depending on the type.

Our order acknowledgment will give the date of shipment, which can be depended upon.

**Prompt
Delivery**

COLONNADES

Modified Mission Style

U No. 1805

U No. 1806

THIS type of Colonnade is commonly used as a division between two rooms extending from wall to wall instead of the customary partition or cased opening. The reverse side of No. 1805 is finished like No. 1806. No. 1806 is finished alike on both the front and reverse sides.

Plain Oak and Unselected Birch units only in Stock.

PRICE LIST

Size of Columns	Size of Pedestals	No. 1805	No. 1806
7 x 7—7.0	2.0 x 4.9 x 12 $\frac{7}{8}$	\$56.00	\$54.00

No jambs, trim or hardware included. Doors glazed plain, D. S.

Each set wrapped in paper and securely crated to prevent soiling or damage in shipment.

For Discounts see our Current Price Guide.

COLONNADES

Modified Mission Style

U No. 1807

U No. 1808

THE two styles of modern Colonnades shown above are not only unusual in design but particularly pleasing. Note the tasteful division of the glass in the doors and the handy little drawers. The reverse of each is finished with a neat panelling in suitable style.

Plain Oak and Unselected Birch units only in Stock.

PRICE LIST

	Size of Columns	Size of Pedestals	Price
Style No. 1807	7 x 7—7.0	2.0 x 4.9 x 12 $\frac{7}{8}$ in.	\$54.00
Style No. 1808	7 x 7—7.0	2.0 x 4.0 x 12 $\frac{7}{8}$ in.	58.50

No jambs, trim or hardware included.

No. 1807, glazed plain D. S., as shown. No. 1808, glazed leaded art as shown, or plain D. S. In ordering, please state style of glazing desired.

Each set wrapped in paper and securely crated to prevent soiling or damage in shipment.

CREAMDOR Interior Woodwork Units

COLONNADES

Modified Mission Style

U No. 1809

U No. 1810

AS a division between two rooms this type of Colonnade is justly popular. At a slight additional cost, the width of the pedestals may be increased, giving more room for books and filling in symmetrically openings as wide as 18 or 20 feet. The reverse side of No. 1809 is panelled like No. 1810. No. 1810 is panelled on both sides.

Plain Oak units only in Stock.

PRICE LIST

	Size of Columns	Size of Pedestals	Open	Glazed D. S.	Glazed Leaded Art
Style No. 1809	8 x 8—2.6	3.6 x 5.6 x 12 in.	\$68.00	\$78.00	\$84.50

PERGOLAS with ROUND COLUMNS

Style No. 30

THE Pergola has become a popular feature of the modern home or garden. This design shows a pleasing application of the Colonial Column to that use.

Where required for this use, orders for columns should so state clearly, so that the special caps and bases required for such exposed use may be applied.

Shipment of all members will be made promptly.

For Dealers' Prices, see our Current Price Guide.

WE carry the most complete stock of Classic and other Porch Columns in the state of Wisconsin, securing our customers such prompt service as no other house offers. The splendid quality of these Columns places them in a class by themselves. They are made from a selected grade of vertical grain, steam-dried, Oregon Yellow Fir, put together with high-grade glue especially prepared for exterior use. Particular care is exercised to obtain the correct architectural proportion of each member.

COMPOSITION CAPITALS For Exterior Use—Scamozzi Model

✠ Best Cement Composition. Correct model ✠

THIS beautifully modeled Capital, designed by and appropriately named for the Italian architect, Scamozzi, is undoubtedly the most popular and generally used of all the numerous patterns called for by the trade.

Our Capitals are moulded with especial care, every detail being sharply and clearly defined.

They are made of a dense, weather-resisting composition especially intended for outside use, and will form a permanent, substantial and elegant feature of any porch of which they are a part.

We carry them in stock, carefully packed for shipment in crates of one-half dozen each, for 6 and 8-inch, and one-third dozen of 10-inch.

PRICE LIST

For 6-inch Columns, each.....	\$1.50
For 8-inch Columns, each.....	2.10
For 10-inch Columns, each.....	2.70

Standard packages contain 6 Capitals of 6 or 8-inch size and
4 of 10-inch.

For Discounts see our Current Price Guide.

Mouldings *and* *House Trimmings*

Creamdor Line

ON the following pages are shown Mouldings selected from our Creamdor line, grouped in correct architectural relation.

Artistic in Character

THESE will show the very practical and artistic character of our line, which we believe to be the best of the kind ever offered to the trade.

Quality and Work- manship

THESE Mouldings are run on heavy modern machines, with especial accuracy as to pattern. All Hardwood Mouldings are manufactured from carefully kiln-dried lumber and all flat faces are smoothed on a drum polisher before shipment. The Creamdor Moulding Units are strictly machine smoothed, not straight machine run.

If a finely finished cabinet grade of work is desired, we will smooth all members on the bench by hand at reasonable rates.

Stock

ON pages 148 to 152 are given the sizes of Mouldings and the kinds of wood in which we carry them, ready for shipment.

Protection

WE recommend that all orders for Interior Mouldings, where shipped by local freight, be wrapped in paper to prevent damage or soiling in transit.

CREAMDOR Interior Finish Units

IN THE MODERN DOMESTIC STYLE

THE patterns under this heading are such as are used in the every-day work of builders of the American dwelling. They represent no particular architectural period or classification, but are simply and tastefully contrived

patterns such as are familiar to carpenters throughout the United States.

It is probable that more standard Millwork is sold in the form of the designs shown on the following pages than of any other kind.

We manufacture these units in a large way and carry many carloads of them enclosed in our warehouses ready for prompt shipment. While made in a large way they are none the less tastefully contrived, and when applied properly, present a handsome and harmonious appearance.

We have grouped the patterns in the different plates on the following pages in such manner as may be of use to those builders who do not employ an architect. If erected in the manner shown they will present as substantial and satisfactory a line of house finish as can be desired.

Buyers who make their orders conform so far as possible to the standard sizes and kinds of woods indicated in this catalog will secure quick service and close values.

A complete set of Exterior Mouldings, suitable for this and other styles of design, are shown on pages 78 to 84.

CREAMDOR Interior Finish Units

IN THE COLONIAL STYLE

THE general form of Mouldings followed in the Colonial Style is Classical and those shown under this head in our group of designs will be found to conform properly to the period.

In this, as in other styles, a wide latitude is permitted the designer, but in order to produce any line economically it is necessary to limit the number of patterns to those which can be used most generally. We have endeavored to select this line with especial care, and patrons who make their choice from it will find upon assembling them that the true Colonial feeling has been secured.

The plates shown on pages 85 to 90 will be of particular assistance to the builder and his client. The trained architectural designer will of course be able to offer many suggestions of individual merit, and to him the full-sized patterns shown on pages 103 to 135 are especially commended.

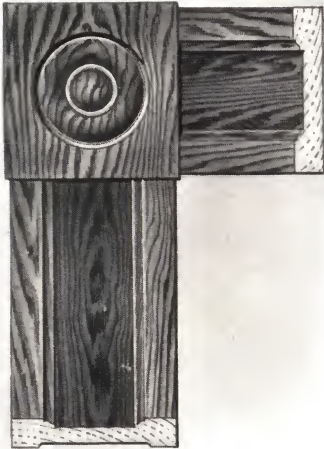

Prompt service and high quality of material will be secured by the use of our Colonial line of Mouldings.

At prices somewhat higher we will make to order any style of Mouldings of this period required by our patrons, and can promise the highest quality of work and the promptest service to be had anywhere.

Buyers should recall that any change of design or size entails additional expense in production.

CREAMDOR Interior Finish Units

IN THE ENGLISH STYLE

THE mouldings and trim units shown under this head can be as accurately applied to other styles of the same general period. We term them "English" because they fit in very nicely to those English Domestic houses, which, with

their peaked gables and substantial interior woodwork, are now so popular in this country. They are practical adaptations of old forms, which have been standardized and placed upon an economical basis, and may be used for a variety of purposes and may be applied with equal propriety to work designed on the German or Flemish lines followed by the present-day builders.

In the finishing and fitting of any building, conformity to architectural style is necessary, or that harmony which is essential to complete satisfaction will be lacking.

Tasteful selections of Doors, Stairs, and the various Cabinet Work required for houses designed in this so-called English style, may be made from our catalog at a great saving over the cost of specially designed Millwork of no better quality.

We strongly recommend this excellently selected line to the consideration of those who appreciate architectural harmony as well as economy.

CREAMDOR Interior Finish Units

IN THE CRAFTSMAN-MISSION STYLE

THIS simple style of house trimming we have carried out with exact fidelity to type in the patterns grouped on pages 98 to 101. All the lines of the Mouldings shown are straight and plain, just such as the old-fashioned carpenter would work out

by hand with his simple tools. The proportions of each design have been carefully considered so as to make them fit the needs of the builder who wishes to follow this very honest type of construction consistently, and at the same time must have regard to economy.

The groupings shown are but a very few of those which any ingenious designer can contrive, as the uses of the Mouldings are practically unlimited.

It is of course understood that curved lines have no place in the Mission or Craftsman type of Mouldings, and the builder who does not employ an architect will do well to have this in mind in making his selection, and to confine himself strictly to a well-chosen set of patterns, similar to these we show.

Our Mouldings are all made from carefully kiln-dried stock. They are run on heavy machines to insure that smoothness of surface which is essential to a good job of Interior Finish.

The Stairs, Cupboards and Case Work shown elsewhere in this book under the Craftsman-Mission classification, are all trimmed with Mouldings of these particular patterns, and the buyer who purchases our Millwork of this type will find his house to be trimmed throughout in a thoroughly tasteful and consistent manner.

Interior Mouldings

THE patterns of Mouldings presented on the following pages have been designed with especial reference to their practical application to the needs of the designer and builder.

They are correct in form and fit in very properly to the several architectural classifications followed in this book.

The patterns are displayed in the exact full sizes to which we manufacture them, and especial care is taken to make each order conform precisely to the profiles shown.

We have designated those numbers carried in stock in the various kinds of wood, on pages 148 to 152.

Another feature convenient to the buyers is the identification of our own series of numbers with the numbers followed in other standard books. The Universal number of the Mouldings like or very nearly like ours is printed in red, so that the buyer can tell at a glance without having to refer to different books. Where our pattern is not exactly the same as the Universal pattern in measurements, our sizes will be furnished.

Practical designers and builders to whom this series of Mouldings has been submitted pronounce it the finest extant.

Official Series

Outside Mouldings

ON the following pages are shown our designs of modern Mouldings for exterior use. We use the "Official Series" of numbers beginning with 6000, the authorized issue of the Wholesale Manufacturers' Association, but for the convenience of patrons using the old Universal list we show the corresponding numbers in the 8000 series under the pattern in red figures. For sizes carried on hand for immediate shipment see table on page 151.

Buyers will please note that our Mouldings are manufactured to the sizes named in the Official List. Where other numbers are mentioned under the patterns or in the Stock List they refer to corresponding pattern only.

All orders will be filled from our Standard sizes at the official listed prices.

Prompt service is assured if orders are placed with reference to our stock numbers.

CREAMDOR Birch Moulding Units are run from kiln-dried stock on heavy machines at slow-feed in order to secure that perfect smoothness essential to a workmanlike job of interior finish.

In extent our assortment of patterns is one of the most complete in the country. In design we claim it to be the best extant.

The term "Unselected," as applied to Birch, refers to the color of the stock and not to its quality. CREAMDOR Birch Trim Units are manufactured from strictly first quality material, free from knots, checks and sap discolorations.

CREAM CITY SASH AND DOOR CO.

The above stock list comprises every ordinary form of Moulding required for the finishing of houses, apartments or commercial structures. There may be more extensive assortments in the hands of competitors; if so, we are not aware of that fact and confidently claim our line to be the most complete and best designed in the Northwest.

As in all CREAMDOR Trim Units, our Red Oak Interior Mouldings are manufactured from strictly kiln-dried lumber of the best texture and quality.

Again we remind our patrons that in using these stock patterns they save both time and money.

The stock lists shown on these pages comprise those Mouldings most commonly used by our customers. They cover a wide range but possibly do not include many patterns used freely in certain localities by individual builders. Any such patterns we will make to order promptly at lowest market rates, and solicit the orders of trade appreciating both quality and service.

Our Exterior Mouldings are made mainly from Pine, the standard wood most favored by our customers. Fir and Redwood we carry only in certain specialties for which we have a continuous demand.
